How to target on mobile devices only

Please go to campaign settings. Go to advanced settings and enable technology targeting.

Select Device -> Mobile.

The screenshot shows the 'Available technologies' section of a campaign settings interface. It features a search bar at the top. Below it, there are expandable sections for '+ OS', '- Device', '+ Browser', and '+ Connection Type'. The '- Device' section is expanded, showing three rows: 'Computer', 'Other', and 'Tablet'. Each row has 'Include' and 'Exclude' buttons. To the right, a 'Name' dropdown menu is open, showing 'Included' (selected), 'Device / Mobile' (highlighted with a red box and an 'x' icon), and 'Excluded'.

How to target specific sources

Please go to campaign settings. Go to advanced settings and enable Sources and domains whitelist/blacklist.

In order to target only specific sources or domains, add them to whitelist. In order to block unwanted sources or domains add them to blacklist.

:domain:
pub_id:site_id:sub_id

You can track sources or domains in your analytics using appropriate macros [SOURCE_ID] or [DOMAIN].

How to target connections (Native and Display)

Please go to campaign settings. Go to advanced settings and enable Carrier targeting.

Type carrier name in the box. Include or Exclude specific carriers.

Carrier targeting Enable Carrier targeting

Available segments

Vodafone

| Name | Country | | Name | Country |
|-----------------------------------|-------------|-------------------|------------------------|------------------|
| No Carrier | | +Include +Exclude | Included | |
| Vodafone 202-05 | Greece | +Include +Exclude | CelCom 502-13 | × |
| Vodafone Libertel 204-04 | Netherlands | +Include +Exclude | CelCom 502-19 | × |
| Vodafone 214-01 | Spain | +Include +Exclude | Celcom | × |
| Vodafone Enabler Espana SL 214-06 | Spain | +Include +Exclude | Vodafone 222-10 | Italy × |
| Vodafone 216-70 | Hungary | +Include +Exclude | Vodafone 226-01 | Romania × |
| Vodafone 230-03 | Czech Rep. | +Include +Exclude | Excluded | |

| Vodafone 276-02 | Albania | +Include +Exclude | | |
| Vodafone 278-01 | Malta | +Include +Exclude | | |

How to target specific SSPs (Native and Display)

Please go to campaign settings. Go to Supply Partners. You can either select "Run on all sources" or target only specific SSPs (please note, that this might decrease traffic volume)

WARNING: When the admin approves your creatives on a limited list of supply sources due to the sensitive content of the creative/landing page, we kindly ask you not to change the list of supply sources. If you want your campaign running on all sources, please **change the creative**. Thank you.

How to enable security filters (Native and Display)

Please go to campaign settings. Go to advanced settings and enable Contextual segments&Filters. Select **Contextual segments & filters** checkbox if you are looking to enable such traffic security filters as Forensiq, Integral Ad Science or advanced in-house filtering (IP based fraud protection).

Contextual segments & filters Enable Contextual segments & filters

Search by name

Available segments

| Name | CPM | |
|---|------|----------|
| - Forensiq | | |
| + Risk Score | | |
| - In-house Fraud Protection Solutions | | |
| - IP Based Fraud Protection | | |
| Exclude proxies & anonymizers | 0.00 | +Include |
| Exclude known malicious bots | 0.00 | +Include |
| Exclude anonymizing VPN services | 0.00 | +Include |
| Exclude public proxies | 0.00 | +Include |
| Exclude web proxies | 0.00 | +Include |
| Exclude TOR exit nodes | 0.00 | +Include |
| - Integral Ad Science (US Desktop Only) | | |
| + Viewability | | |
| + Media Quality | | |
| + Brand Safety | | |

| Name | CPM | |
|--|------|---|
| Included | | <input checked="" type="radio"/> Or <input type="radio"/> And |
| Forensiq / Risk Score / Target only Non-Suspect users (Forensiq Risk Score < 64) | 0.10 | x |
| In-house Fraud Protection Solutions / IP Based Fraud Protection / Exclude datacenter IPs | 0.00 | x |
| In-house Fraud Protection Solutions / IP Based Fraud Protection / Exclude spiders | 0.00 | x |
| Total contextual cost | 0.10 | |

Note: there are 3 levels of quality within Forensiq and 4 filterings within IAS (Media Quality, Brand Safety, Viewability, IAB Contextual Segments), the cost of which is 0.10 CPM. However, you may select several IAS filtering levels and the cost still will be 0.10 CPM. The same with Forensiq. But IAS and Forensiq filterings costs will be summed up (0.20 CPM). Platform in-house filtering available for free.

How to target OSeS, Devices, Browsers, Connections

Please go to campaign settings. Go to advanced settings and enable Technology targeting. There you have options to either target or exclude specific OSeS, Browsers, Devices and Connections.
