

How to target **Twitter**

With [Rapidhits](#) it is possible for your ads to be displayed on **Twitter**. Follow steps below to correctly set up your campaign.

Twitter traffic is available for Native and Display campaign types.

Once you go through **basic campaign settings**, you need to move to **advanced settings**. Check out our quick start guides for Native and Display campaign here:

<https://www.rapidhits.net/new-campaign-guides/>

In **advanced settings** search for **Supply Partners**. There you need to select **Mopub Display** SSP, as it is the one targeting **Twitter** traffic.
